A reward of \$10 will be paid for information that will lead to the arrest and conviction of parties stealing the Bonanza from premises of subscribers.

TO SUBSCRIBERS

Parties who do not receive their papers, or who have any cause of complaint, will oblige by notifying this office.

Entered at the Postoffice in Tonopah as second class matter.

EDITORIAL COMMENT

MEANS MUCH FOR THE COUNTRY.

The resumption of work in the mines of Butte and Anaconda presage only one thing, and that is the return, on the double quick, of prosperity's march. The Associated Press dispatches, which carried the good news, stated that there would be a return to work of 12,000 men. The papers of Butte and Salt Lake state there will be not less than 10,000 men go to work.

This is not all of the story; it is but the beginning. The men of Butte and Anaconda will form but a small proportion of those who will be affected by the resumption of work in the mines and the Washoe smelter. The increase of the production of copper means that the red metal is again in demand, and there are thousands and thousands of men engaged in the work where it is used. It means that there will be a resumption of work in other copper mines, that it will be a good thing for the mines of this State. The price of the metal is bound to increase and that will warrant a still greater production. There will be a greater demand for the silicious ores of this State, there will be more mines working. It will be good for the mines of Ely and the smelters; it will be good for the mines of Tonopah and all the producing properties of the State.

There is another smelter to be opened up on the first of April at McGill, Nevada. It has just been completed at a cost of \$8,000,000, and it will give employment to many men. The news from Angels Camp in California is to the effect that all the mines there are again working after having been closed down for a number of months.

All these facts point the return of prosperity, and it looks as if President Roosevelt had beaten down the financial powers who were responsible for the panic, and who had threatened to bring about another if the big stick were not suspended. The railroads have apparently called off their threat to retrench to the point of hardship among their employees in order to force the President to let go in his fight against the corporations. Men have been out back to work on the roads and in the shops, and this fact accounts in a great measure for the demand for copper and the opening of the copper mines. When prosperity begins its march everybody and every industry joins the procession and the way now seems clear for the march.

WELLS-FARGO SUSPECT TAKEN

RENO, March 2.—The first arrest in connection with the robbery of several thousand dollars in gold and silver from one of the Wells-Fargo express wagons in Reno, February 17th, was made at Golconda yesterday afternoon, and the arrest will probably prove the first real clue the Wells-Fargo detectives will have to work on.

Constable Johnson of Golconda arrested a man at Golconda, who was a total stranger there and in the surrounding country, who was about half intoxicated and was talking wildly and freely about how "he had got the best of at least one great corporation," and that he knew who it was who had committed the bold theft.

The man was well dressed, his clothes apparently being quite new, and he was spending money with great abandon, and would frequently say "that he had lots more where that came from."

When taken into custody by Constable Johnson, the man quieted down and would have little to say. He would not divulge his name, saying that "John Jones" would be sufficient for the purpose.

When asked where his money came from, he said that "he had recently gotten a great deal of money from the Wells-Fargo Express Company," but immediately afterwards seemed sorry that he had said anything at all, and could not be induced to add to the statement.

ITALIAN RACERS ENTER PROTEST

CHICAGO, March 2.—Before leaving Chicago today the drivers of the Italian car filed a formal protest against the American car. This document recites that the American machine was altered while it was undergoing repairs at Buffalo; that it was slowed two days without the motor running; that it was towed by a trolley car in Indiana; that it used the railroad tracks between Michigan City, Ind., and Chicago, and that it was put on sledges.

LURED WOMEN THEN BEAT THEM

ELY, Nev., March 2.—Dr. Geo. B. Simpson, prominent physician of this city, is under arrest here on a charge of beating Mrs. Truesdale and Miss Bertreby, two women employed in the Northern hotel.

It is alleged by the women that Dr. Simpson got them into the basement of the Union drug store and beat them severely and that he would have murdered them had not an officer heard their cries and rushed to their rescue.

Mrs. Truesdale asserts that she was passing the drug store when she heard a woman screaming and that on entering the basement of the store where the screams were heard she found Dr. Simpson beating Miss Bertreby. She further alleges that when he saw her, Dr. Simpson turned upon her and also gave her a severe beating.

The physician claims that the women were fighting in his drug store and that he had to beat them to make them desist.

The physician is now out on \$200 bonds.

TURNING OUT THE BEST WORK

The bindery of the Bonanza is turning out the best work in the city, and it is giving such great satisfaction that anyone who has his work done there once, never goes anywhere else. The plant is the finest and most complete, not only in the State, but this side of San Francisco. We can turn out all kinds of work that is demanded in the offices of lawyers, brokers, promoters, mining companies, or for any other kind of business, and we guarantee satisfaction in every respect. One trial will be sufficient to establish the truth of this statement. It pays to go where only the best kind of work is done, and it pays to patronize home industry.

Entire stock of Ebbert Bros. now being sold for benefit of creditors. See windows for prices.

Journals, cash books and ledgers—just the thing the merchant needs—best that can be made. For sale at the Bonanza office.

RENOITES BUY CALIFORNIA MINE

AUBURN, March 2.—F. E. Bryce, P. Lozano and A. N. Smith have bonded the Bellevue mine at Ophir to a company from Reno. The latter have not as yet incorporated and have not yet taken any title to designate the company. They took charge of the mine Monday and proceeded at once to sink and otherwise develop the vein. The company has elected the following officers: Richard Korman, president; W. J. Harris, vice-president; Fred Grob, treasurer, and R. J. Trimble, manager.

These officials are connected with the management of the Farmers and Merchants' Bank at Reno. Manager Trimble and his associate, J. E. Gignaux, are Nevada mining experts and engineers. Captain W. C. Rose of Reno, also a mining man, negotiated the deal and is a member of the company.

The company is strong financially and guided by its expert manager will assuredly open a new era in quartz mining in this county. The vein is rich, and has always paid its owners. The last crushing of thirty tons averaged \$50 per ton.

WORKMEN KILLED BY AN EXPLOSION

(By Associated Press.)
SPOKANE, Wash., March 2.—Two men were instantly killed by an explosion near Marcus, Wash., this morning, two more are believed to be dead, and another fatally injured, while several are suffering from bruises, the result of a landslide. A wrecking crew was putting in a blast to clear the track and a stick of dynamite had been placed in one of the holes, when an Italian began to tamper it with his drill, causing it to explode.

SMOOTH FORGER IS IN THE TOILS

(By Associated Press.)
LOS ANGELES, March 2.—Chas. Viterna, said to be known in every city of importance in California by different aliases, was arrested here this afternoon on a charge of having raised a draft and collecting upon it \$958.00. The paper purposed to call for \$2000. It is stated that Viterna was formerly cashier of a small bank in Verdigr, Nebraska.

HART DISTRICT IS LOOKING GOOD

"If Hart were in Nevada it would be having as big a boom as Rawhide," said Walter C. Stone, upon his return from an automobile trip to the new camp across the line. He was accompanied by E. R. Thompson, Mr. Stone continued:

"Mr. Thompson and myself have not yet acquired any holdings in the camp, but we have two men there who are lining up several propositions for us.

"I think a great deal of the new district, from a prospective standpoint. The first glimpse is not reassuring, for the entire country rock is granite, but in the immediate vicinity of the new camp there is a great intrusion of porphyry, in which and along the lines of contact the values are found.

"The croppings are bold and the ledges seem to be of enormous size and to possess permanency. While some high grade is being taken out, it is only by sorting and I think that the future of the diggings is a large milling proposition.

"You would be astonished to find the cheapness of things there, for it to be a desert country. Why, for \$7.50 a ton ore can be transported to Needles and treated in the smelter there. It is only a three-mile haul to the nearest point on the railroad.

"The formation at Hart is very similar to that at Searchlight. The two places are not more than fifteen miles apart on an airline. Hart will undoubtedly become as important a town as Searchlight, and possibly greater, if it ever gets mills of its own. There will be no difficulty in developing water and supplies can be hauled in over a branch railroad.

"Hart is very different from a Nevada mining camp. There is only one saloon for 500 men and no gambling whatever. There is nothing of the boom and hurrah which attaches itself to a new mining camp on this side of the State line."—Goldfield News.

LAWYER A SWINDLER.

CHICAGO, March 2.—John Stirlen, a disbarred Chicago lawyer, who with several associates was indicted several months ago on a charge of having used the mails to defraud promoters of business enterprises, was convicted tonight in the Federal Court.
